

Kuenzang Tshering

Environmental Chemist

Kuenzang Tshering (Mr) is a current Ph.D. scholar at Edith Cowan University in Australia. He is investigating the impacts of wildfire on water quality in catchments supplying drinking water to Perth Metropolitan City using field-based plot experiments and laboratory-based simulations. He also conducted research on water quality, nutrient dynamics, and wetland biogeochemistry in lakes and streams in Australia, Bhutan, Canada, Nepal, and East Africa. He earned his Master in Environmental Engineering and Technology in 2011 from UNESCO-IHE in the Netherlands. His BSc in Biology & Chemistry (2006) was from the University of Delhi. He previously worked for International Centre for Integrated Mountain Development (Nepal) and Bhutan Trust Fund for Environmental Conservation. Email address - tershong@gmail.com
